

Editorial of the International Document Publishing Journal of the Maost Unity Group of the Proletarian Party of East Bengal, PBSP MUG/Bangladesh, (*Anubad Sahityo Potro*) Issue No. 08

We had to enter in the arduous practice of studying collected works of Mao and Chinese revolution, what is absolutely necessary to understand Maoism. The Nepalese revolutionary cadres and masses are feeling stiff in agony of numbness that what a serious error can be to deviate from that point. By being obedient to Maoism, revolution can be developed even with an average understanding of that. Their case is different who promulgate negativism.

In this issue we published two very much important works of Chairman Mao: I) Present Situation and Our Task II) Example of Dialectics; And a fundamental document of the Communist Party of Peru: International Line.

The first one is the document adopted in the central meeting of CPC in December, 1947. Chairman Mao had submitted this document that he prepared to the meeting. There is excellent explanation of world and Chinese situation in it. It was prepared in context of final victory of world people against Fascism and Chinese people's achieving decisive victory in Chinese revolutionary war. Following the development of Chinese revolutionary war, this article will help us to understand laws of war in short, socio-economic system, Bureaucratic Capitalism, Agrarian Program viz., land reform, the outlook of CPC towards different classes, general program of New Democratic Revolution and ideological rectification as well.

....The second article was prepared in 1959. This is a very important of philosophical work of Mao, the pioneer of dialectics where hundreds of examples have been set to establish dialectics. In that period of time, he wished to see 600 million dialecticians in China. He is the advocate of dialectics. We need to be genuine dialectician. This is why we need serious study of this article right at the moment.

We had started publishing fundamental documents of Communist party of Peru five year before. Despite late, we have taken step to complete that task now. In this issue, International line, one of the fundamental documents adopted in the first Congress of Communist party of Peru (PCP), is published. Apart from other fundamental ones, especially it is a very important document of international importance. Here advance doctrine has been put forward by emphasizing upon international general line in view of forging a new international, and surely that helped Revolutionary Internationalist Movement (RIM) to achieve basis. Of course, PCP got support from the international proletariat for their revolutionary courage to complete the unfinished task of Chairman Mao of building an international general line.
